

Product Info: Dietrine Carb Blocker

Our Dietrine Carb Blocker contains 100% Genuine Phase 2® Brand Starch Neutralizer produced by Pharmachem Laboratories. Each serving (two caplets) provides 1,000 mg of Phase 2®. Phase 2® is an amazing, non-stimulant, all-natural nutritional ingredient that is derived from the white kidney bean. It is the first nutritional ingredient that has been clinically & scientifically proven to neutralize starch, found in in your favorite foods such as potatoes, breads, pasta, rice, corn and crackers. Phase 2® is a safe yet powerful nutritional ingredient, clinically studied to help reduce the absorption of starch calories.

Supplement Facts		
Serving size 2 Capsules		
Servings per container 30		
	Amount Per Serving	% DV
Chromium (as Chelavite® chromium dinicotinate glycinate)†	200 mcg	167
Phase 2™ extract (Phaseolus vulgaris)††	1000 mg	*
Vanadium (as vanadium amino acid chelate)	100 mcg	*
* Daily Value (DV) not established		

During the digestive process, your body converts carbohydrates, found in starchy foods such as potatoes and pasta, into sugar. Your body does this by breaking-down the carbohydrate molecule with alpha amylase, an enzyme that is produced in the pancreas. These sugar calories are either burned off, through exercise, or stored as fat cells for future use. Unfortunately, inactivity means that these stored fat cells accumulate. The result is weight gain.

Phase 2®, an exclusive, all-natural nutritional ingredient extracted from white kidney beans, helps neutralize the digestive enzyme alpha amylase before it can convert starch into glucose and then fat. Essentially, it allows the carbohydrates to pass through the system possibly with less caloric intake.*

Do not be fooled by cheap products that may contain a generic white kidney bean extract plus some Phase 2. These products do NOT contain 100% of the Phase 2® extract and may not work as well.

Chromium (Chelavite) supports normal blood sugar and is a fat transporter. Helps insulin regulate the metabolism of carbohydrates, proteins & fats. Chromium helps support heart health and balanced blood sugar levels. Chromium is a true "miracle mineral" and is necessary for pancreatic action, insulin production and also for overall Glucose Tolerance Factor which is how the body recognizes sugar in the body and regulates production of Insulin to the cells. The form we use is called Chromium Chelavite. It is the most powerful form available today and was developed by a leading mineral biotech scientist in Utah after some 15 years of research into increasing the body's capacity to assimilate and then utilize the Chromium. Chromium Chelavite is so advanced in its performance capacities, it was recently awarded a special patent for its abilities.

Vanadium is a trace element that was named after the Scandinavian goddess of youth and beauty. It is necessary for cellular metabolism and for the formation of bones and teeth. Vanadium inhibits cholesterol synthesis and plays a vital role in growth and reproduction of the body. This mineral has been shown to improve insulin utilization, resulting in improved glucose tolerance. A trace mineral like chromium chelavite, this nutrient is essential for efficient cellular activity. It works remarkably well as a powerful insulin mimic, and has been shown to maintain blood sugar levels that are in the normal range.
